Admin: North Street Global
Legal: Thompson Coburn

FUND STRATEGY:

The EIA All Weather Alpha Fund I, L.P. is a quantitative long/short equity fund which exploits inefficiencies in the global equity markets to achieve attractive absolute returns. It invests in high-quality businesses that are trading at a discount to their intrinsic value. The Fund's objective is to outperform the S&P 500 and generate an annual return of at least 7%.

The Fund utilizes GLM Analytics, a proprietary quantitative research platform, to identify investment opportunities, forecast returns, evaluate when to buy and sell stocks and measure portfolio risk. This analytics platform assesses both quantitative and qualitative factors, and it allows the Portfolio Manager to manage the Fund unencumbered by emotions or inherent bias.
